

Write an algorithm which will print all the node numbers having data part contains even values

09 August 2020 21:58

```
Checkeven(start)
If start=null
  Print "empty list"
  Exit
End if
Ptr <- start
Count <- 1
repeat
  If ptr-> data%2=0
    print count
  endif
  ptr->link<-ptr
  count = count + 1
  If ptr = null
    exit
  Endif
End repeat
End
```

Count	data	printed value
1	3	
2	4	2
3	5	
4	6	4
5	7
